

## Technology Supply List for Families 2020-21

### Student Headphones Specifications

We are eager to begin a new and innovative year in Short Hills! In our curriculum, we use various apps on the School's iPads and Chromebooks that require voice recordings and listening. In order to avoid sharing headphones, we ask that students bring their own set to school. Headphones should include an in-line microphone for recording purposes. The headphones that we recommend—[Ailihon C8](#) or [Besom i36](#)—cost around \$20. We have found that earbuds do not work well for little ears, so we recommend over-the-ear headphones.

### Charger Specifications

Students may need to be able to charge their Pingry devices at home, particularly if they are remote. There will be opportunities to charge device in school, but those will be dependent on how much use the device gets during the day. Charging at home will require two chargers:

**[USB-C chromebook charger](#) per child (except Grade 3)**

**(Note: Because Grade 3 chromebooks have a unique charging system, Pingry will provide those chargers to families.)**

**[Lightning charger and USB power adaptor](#)**
